ROCKY

Rocky is a sculptural piece. It can be used as a console or a credenza, but will also accommodate books and objects to become the most graphic display or bookshelf.

Designer Charles Kalpakian plays with our perception of space and volume with an object that reveals itself and changes according to the observer's point of view.

THE DESIGNER

Charles Kalpakian was born in Beirut, Lebanon, in 1982. After collaborating with prestigious agencies including Ora Ito and Christophe Pillet in 2011, he launched his design studio and has since then been developing his own projects. He draws his inspirations from his roots in France and Lebanon, as well as street-art culture. These influences take shape through the reinterpretation of patterns issued from the decorative art that were in turn inherited from the history and geography of Lebanon.

Charles' line of work is always sharp yet flexible; almost like the strokes created by a calligraphy brush.
Charles collectible designs «Cinétisme», «Moon» and «Clé de sol» are shown exclusely by Galerie BSL in Paris.
He also created the Rocky credenza for La Chance.
Since then, he has also been working with companies and brands such as DCW, Habitat, Haymann Edition, Nemo lighting, Dupont Corian, Lelievre, PUIG, Fondation Luciano Benetton, JM design gallery in Beirut and also designs private commissions.
